

OUR EXPERIENCE

P. Kasper & Associates has provided support and solutions for over 30 pharmaceutical, biotechnology, and medical device companies, and CROs since 1995.

Patty and her team have trained more than 1,300 individuals in corporate and academic training programs in the San Francisco Bay area.

Some former clients include:

Abgenix
Affymax
ALZA
Amgen
Boston Scientific
Cell Genesys
Cell Therapeutics
Cerexa
Elan Pharmaceuticals
Genentech
ICON
Johnson & Johnson
Pharmaceutical Research Associates (PRA)
Pharmacyclics
Sangamo BioSciences

Clients appreciate Patty and her team because they are experienced, knowledgeable and honest.

Patty's depth of knowledge regarding clinical trials and the biotech industry and her wonderful communication style enables Patty to effectively teach valuable skills to a wide range of students/professionals."

- Starr McNamara, CCRA

THE GO-TO EXPERTS FOR CLINICAL TRIAL PROCESS

PATTY KASPER is a recognized expert in clinical research training and operations.

Since founding P. Kasper & Associates in 1995, she and her senior clinical research consulting team have brought well-designed training programs to the biopharmaceutical and medical device industries. Her hallmark hands-on interactive learning modules bring an exciting real-world element to her classes increasing the effectiveness of the training environment.

Patty has direct experience with Phase 1 through 4 clinical research trials in numerous indications and has directed studies in the US, Canada and Europe. Over the last 15 years, she and her team have successfully guided numerous biopharmaceutical companies through the rigors of drug development.

With a passion for sharing her experience and knowledge, Patty's personal and professional philosophy is Learn to Grow. A quest for knowledge is what moves us forward in our life, as well as our career, and creates a recognition of the necessity to continually expand our horizons.

Patty earned a MS in Bacteriology and Public Health from Washington State University. She has been on the faculty of UC Santa Cruz Extension since 1999 as part of their prestigious Clinical Trials Design and Management Certificate Program.

CLINICAL RESEARCH TRAINING AND OPERATIONS

*A Passion for Results
The Expertise to Succeed*

CORPORATE CONSULTING

OUR SERVICES

P. Kasper & Associates is An Excellent Choice

FOR TRAINING

We teach the fundamentals of GCP so that staff members feel confident about clinical research regulations.

We train on the issues surrounding the ever-changing regulatory requirements so that your team stays current with GCPs.

FOR CLINICAL OPERATIONS

We provide expert support and solutions for your clinical trial needs.

We deliver leaderships and expertise so your team will meet key deadlines and achieve success.

Whether you need assistance with start-up operations such as creating SOPs or have encountered difficulty mid-trial, P. Kasper & Associates can put highly skilled professionals on your team precisely when and where you need them.

IS YOUR CLINICAL TRIAL PROPERLY SUPPORTED?

- We do a gap analysis then write the clinical SOPs so you will be in compliance with GCP.
- We set up a plan and perform co-monitoring visits to give you feedback on the monitors and ensure accurate and complete data.
- We reconcile and verify data queries from various sources to create a clean data set.
- We set up systems and compile documents so that clinical departments and investigative sites are audit-ready.
- We have senior consultants with excellent experience to fit your needs and produce results.

IS YOUR STAFF PROPERLY TRAINED?

- We train management skills, such as identifying key performance indicators, to hold CROs accountable and achieve timely results.
- We summarize and clarify the new guidance documents and regulations to ensure compliance with GCPs.
- We provide one-on-one mentoring as well as group training for Monitors, CRAs and Clinical Trial Assistants so that each individual can succeed.
- We employ interactive hands-on training programs to increase the effectiveness and retention of the material.

"Patty is such a knowledgeable and experienced clinical research professional and consultant... I can always get the guidance I need from her. She is definitely one of the best mentors any one could wish to have."

- Shirley Feng, student
